

Waste Go® Biological Wastewater Treatment / Organic Waste Eliminator - Application Instructions

All systems are different and there are many variables that will affect how much product is needed to keep them clean. These dosage rates are a suggested starting point and may need to be adjusted depending on the results you are seeing. A neutralizer like Kontrol may be needed if pH is low or sanitizers are an issue. Contact your Waste Go® distributor for more information.

GREASE TRAP DOSAGE RATES

Initial Dosage: Mix and let stand no longer than 1 hour while cleaning trap. (Remove solids and liquids.) Pour mixture into cleaned trap.

<u>GREASE TRAP SIZE</u>	<u>WASTE GO®</u>	<u>WARM WATER</u>
0-100 gallons	2 lbs.	4 gallons
100-500 gallons	4 lbs.	5 gallons
500-1000 gallons	8 lbs.	10 gallons
1000-2000 gallons	12 lbs.	15 gallons

Maintenance Dosage: Apply every night after all clean-up is done to a drain leading to a grease trap.

<u>GREASE TRAP SIZE</u>	<u>WASTE GO®</u>	<u>WARM WATER</u>
0-100 gallons	1/2 cup	1 gallon
100-500 gallons	1 cup	2 gallons
500-1000 gallons	2 cups	4 gallons
1000-2000 gallons	4 cups	8 gallons

*Dosage rate may vary depending on flow, meals served, and sanitizers used. Adjust as needed.

SEWAGE TREATMENT PLANTS / LAGOONS / LIFT STATIONS / COMMERCIAL SEPTIC TANKS

Initial Dosage: Amount calculated by total volume of tank / lagoon to be treated. Apply for 5 consecutive days.

- 1 lb. for 0 - 16,000 gallons of volume if the tank is dead or has no activity
- 1 lb. for 0 - 25,000 gallons of volume if the tank has some activity but also has solids buildup and scum.
- 1 lb. for 0 - 50,000 gallons of volume if the tank has some activity and minimal buildup.

Example: If you have 300,000 gallons total volume with solid buildup and scum, you would need $300,000 / 25,000 = 12$ pounds per day for 5 consecutive days as an initial dosage.

Maintenance Dosage:

- 1 lb. for each 100,000 gallons as a weekly maintenance dosage.

Example: If you have 300,000 gallons total volume the maintenance dosage would be 3-pounds per week. This dosage can be adjusted as needed. If solids and scum start to build up, increase the weekly dosage.
